Section D: Comprehension MCQ (5 x 1 mark)

Read the passage carefully and answer the questions 21 to 25.

Cycling can be quite a challenge to some. From a four-wheeled to a two-wheeled bicycle, balancing plays a major role to allow you to stay off ground. This is very true for the new vehicle that runs on electricity. It is called the Segway, a two-wheeled, self-balancing electric vehicle invented by Dean Kamen in 2003. This ingenious invention has indeed taken the world by surprise.

To operate this vehicle, you lean forward to go forward and lean back to go backwards. To turn, you will use a "Lean Steer" handlebar, turning it left or right. Sounds easy? As long as you maintain your balance, it needs little effort to travel anywhere in this vehicle.

However, like every new product, there are always faults, be it minor or major. When it was first launched in 2003, approximately 6,000 Segways were recalled due to a defect which caused the vehicle to stop suddenly when the batteries ran dry.

There were also other faults. Users have had accidents when their vehicles stopped suddenly, jerked unexpectedly or failed to properly respond to controls. These caused them to lose balance or get knocked off the vehicle. Injuries sustained included neck and back injuries, brain injury as well as fractured arms or legs.

Segways are now in-built with the maximum speed limit, depending on the country's specifications. In some countries, they enforce the Segway owners to be licensed before they can ride the vehicle around. Some countries have even banned such motorised vehicles from the sidewalks so as to prevent any accidents. Helmets are also a must if you ride on one.

All in all, Segways are still an easy mode of transport, as long as the users take the necessary training and precautions.

Adapted from SPIN Asia Magazine, August 2009

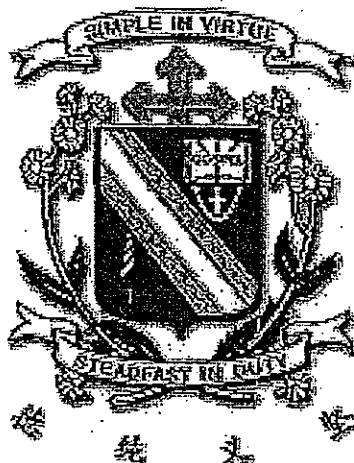

Choose the correct answer (1, 2, 3 or 4) and shade the correct oval on the Optical Answer Sheet.

21. The Segway is a _____.
- (1) two-wheeled bicycle
 - (2) four-wheeled bicycle
 - (3) two-wheeled vehicle
 - (4) four-wheeled vehicle
22. Which word has the same meaning as "ingenious" in paragraph one?
- (1) fascinating
 - (2) complicated
 - (3) outstanding
 - (4) resourceful
23. A Segway that is functioning well will _____.
- (1) turn left when you lean it right
 - (2) jerk occasionally when you ride on it
 - (3) stop suddenly when the batteries run dry
 - (4) move forward and backwards depending on your balance
24. Some safety measures taken by some countries include _____.
- (1) wearing a helmet
 - (2) licensing the vehicle
 - (3) traveling at any speed you like
 - (4) riding on the sidewalks with the pedestrians
25. Which of the following statement is true about the passage?
- (1) The Segway does not run on electricity.
 - (2) Body injuries are rare when the vehicle is not functioning well.
 - (3) In 2003, the launch was a success with 6,000 Segways free of defects.
 - (4) In some countries, it is against the law to ride the vehicle without a licence.

Section J: Comprehension Open-ended (5 x 2 marks)

Read the passage carefully and answer the questions 56 to 60.

"No way! What a depressing morning!" I muttered under my breath. 1

The second I turned the corner on my way to school, I saw the crowd, the commotion and the dingy gray body bags being wheeled out of the dilapidated hotel. The passers-by simply stood there and stared at the horrific scene.

My hands searched into my blue tote bag and I whipped out my camera. I weaved through the crowd towards the entrance of the hotel. I started snapping away, as if I was a photojournalist. I knew that I should not be doing this but curiosity got the better of me. After a few more shots, I was ready to head off. 5

Suddenly, two muscular paramedics wheeled out one more body. Behind them were men in suits and uniforms. With their hardened looks, it was clear that they had seen such scenes before. They were talking and shaking their heads. Just then, one detective spotted me and walked towards my direction. 10

I quickly took my last shot and that was the moment when I screamed at the top of my lungs! One of the body bags moved! The zipper was creeping backward. A finger emerged, then the entire hand, bleeding profusely. Soon, the bloody hand was desperately pushing through the bag, reaching for help. I had to do something! 15

"What are you doing here, young lady?" I turned around and saw this pair of dark, intense eyes staring right into mine. I started to cry, tears streaming down my cheeks uncontrollably. I pointed towards the moving body bag with my eyes shut tightly.

The next second, I could hear the detective yelling. The paramedics and the other detectives turned and saw the pair of bloody hands flailing for help. They worked frantically to save the situation. The crowd watched in disbelief as the paramedics carried the injured victim carefully out of the body bag and into the ambulance. 20

Seeing that she was rescued, I dried my tears and headed towards school, feeling dreary and dazed. 25
