For each question from 1 to 5, four options (1, 2, 3 and 4) are given. One of them is the correct answer. Indicate your choice in the brackets provided.

1. The classification diagram below shows how two different sets of things are grouped.

Which one of the following can be placed in Group B?

- | | |
|--------------|-----------------|
| (1) cupboard | (3) cooking oil |
| (2) ruler | (4) spoon |

()

1

4. Jun Jie spotted an amphibian in his school garden. Which one of the following is the characteristic that he would be able to observe?

- (1) It can fly.
- (2) It has scales.
- (3) It has a beak.
- (4) It has moist skin.

()

5. Ling Ling observes some characteristics of Animal X.

- It lays eggs.
- It has a beak.
- It has feathers.
- It lives on land.

Which one of the following animals could most likely represent Animal X?

(1)

(2)

(3)

(4)

()

3

2. Which of the following statement(s) about moss and the bird's nest fern is/are true?

- A They bear fruits.
- B They are non-flowering plants.
- C They cannot make their own food.

- (1) A only
- (2) B only
- (3) A and B only
- (4) B and C only

()

3. Study the diagrams below.

Which of the following headings are suitable for Groups X and Y?

	Group X	Group Y
(1)	Plants	Animals
(2)	Water Plants	Land plants
(3)	Flowering plants	Non-flowering plants
(4)	Reproduce by seeds	Reproduce by spores

()

Section B: Open-Ended Questions (5 marks)

For questions 6 and 7, fill in your answers in the spaces provided.

6. The diagrams below shows the faces of 4 alien creatures.

(a) Based on diagrams above, classify A, B, C and D into 2 groups.

[1]

Group X	Group Y

(b) Based on your classification in (a), give a heading to represent Group X and Y.

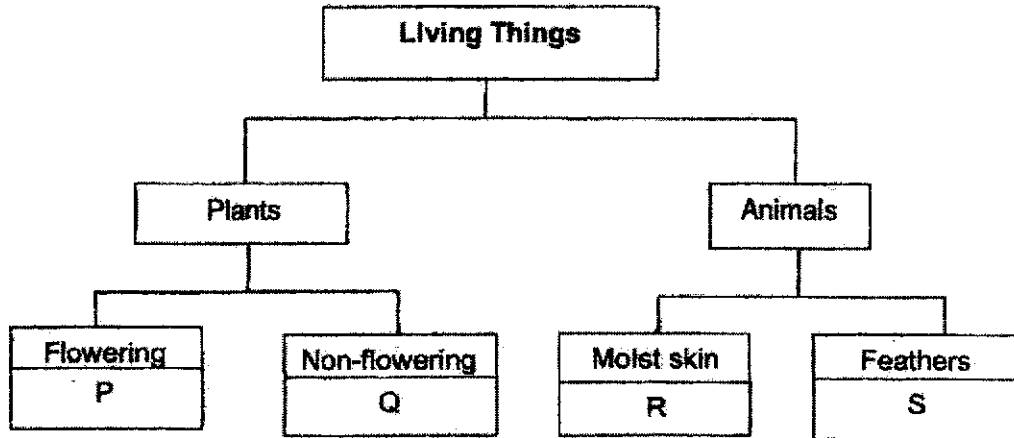

[1]

Group X: _____

Group Y: _____

7. Study the classification diagram below.

(a) Which letter best represents a rose plant? [1]

(b) Based on the diagram above, state a similarity between Plant Q and Animal R. [1]

(c) State one difference between Animal R and Animal S. [1]

- (4) All fungi and bacteria can be seen with the naked eye.

()

4. Boon Teck recorded his observations of the three objects in the table below.

Object	ruler 	coin 	eraser 
Material	wood	metal	rubber
Length	30cm	1 cm	3 cm

Boon Teck dropped the objects one at a time into a tank of water.

Which one of the following will Boon Teck observe when all the 3 objects are in the tank of water?

- (1) All 3 objects sink to bottom of tank

- (2) All 3 objects float on the water.

- (3) Coin floats on water
Eraser is in middle of tank
Ruler sinks to bottom of tank

- (4) Ruler floats on water
Coin and eraser sink to bottom of tank

3

5. Study the properties of the 3 objects in the table below. A tick (✓) represents the property that the object has

Property	Object A	Object B	Object C
Flexible	✓	✗	✓
Waterproof	✗	✓	✓
Strong	✗	✓	✓

Which of the following can the objects be?

	Object A	Object B	Object C
(1)	writing paper	metal plate	plastic bag
(2)	plastic bag	tissue paper	rubber band
(3)	ceramic bowl	wooden box	writing paper
(4)	drinking glass	plastic bag	cotton T-shirt

()

Section B: Open-Ended Questions (5 marks)

For questions 6 and 7, fill in your answers in the spaces provided.

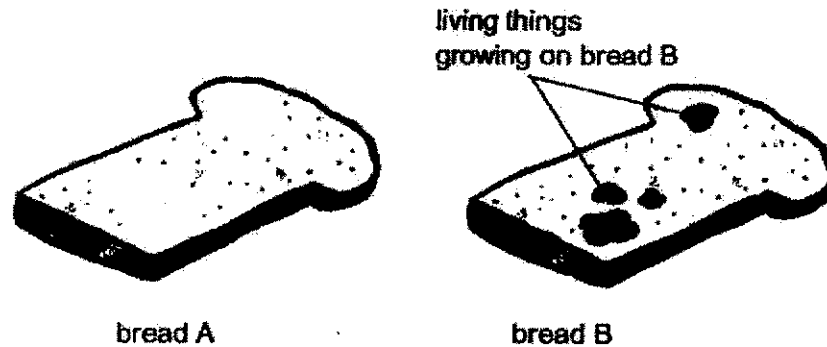

6. Maya carried out an experiment on two pieces of bread.

On bread A, she placed the bread in the oven for 10 minutes so it would be dry.

On bread B, she sprayed water.

Maya then placed both pieces of bread on the kitchen table.

The photograph below shows the two pieces of bread after a week.

- (a) What is the living thing that is growing on bread B but not bread A? [1]

- (b) Based on this experiment, state the condition needed for the living thing to grow on bread B but not bread A. [1]

7. The diagram shows a pair of safety goggles used by doctors and nurses.

- (a) Name a material that can be used to make part X. [1]

- (b) Based on a property of the material you have chosen in (a), explain why it is suitable for making part X of the safety goggles. [1]

- (c) State another property **NOT** stated in (b) that the material should have so that the goggles can be used safely. [1]
