

HENRY PARK PRIMARY SCHOOL  
PRIMARY 5  
TERM REVIEW 2

NAME: \_\_\_\_\_ ( ) CLASS: PRIMARY 5 \_\_\_\_\_

DATE: August 2016

Duration of paper: min

Parent's Signature: \_\_\_\_\_

**Section A (8 x 2m = 16m)**

For each question from 1 to 8, four options are given. One of them is the correct answer. Make your choice (1, 2, 3 or 4) and write the number in the brackets provided.

**P5 Math Term Review 2 Revision Practice**

Name: \_\_\_\_\_

Class: \_\_\_\_\_

Questions 1 to 5 carry 2 marks each. Show your working clearly in the space provided for each question and write your answers in the space provided. For questions which require units, give your answers in the units stated. All diagrams are **NOT** drawn to scale. (10 marks)

1. After spending  $\frac{1}{5}$  of his money on lunch, and  $\frac{2}{3}$  of his money on transport, James had \$29.20 left. How much money did he have at first?

Do not write in this space

Ans: \$ \_\_\_\_\_

2. The usual price of a bed frame is \$2250. This price does not include the 7% GST. What is the sale price of the bed frame, inclusive of GST?

Ans: \$ \_\_\_\_\_

**P5 Math Term Review 2 Revision Practice**

Name: \_\_\_\_\_

Class: \_\_\_\_\_

3. There were 72 pupils in the school hall at first. Then another 18 boys walked into the school hall. The ratio of the number of boys to the number of girls then became 4 : 5. How many boys were in the school hall in the end?

Do not write in  
this space

Ans: \_\_\_\_\_

4. Mr Lim placed potted plants at equal distance apart from each other to form the perimeter of a square garden. There was a potted plant in each corner. Given that there were 4 potted plants on each side of the garden, how many potted plants did Mr Lim place?

Ans: \_\_\_\_\_

**P5 Math Term Review 2 Revision Practice**

Name: \_\_\_\_\_

Class: \_\_\_\_\_

5. The table below shows the survey results of the favourite fruits for some pupils. What is the percentage of pupils who chose the two most popular fruits?

Do not write in  
this space

Fruits	Number of Pupils
Apple	47
Banana	18
Durian	72
Guava	15
Mango	32
Watermelon	16

Ans: \_\_\_\_\_%

Name: \_\_\_\_\_

Class: \_\_\_\_\_

7. In a box, 45% of the beads are red, 15% are blue and the rest are yellow.

- (a) What fraction of the beads is yellow? Give your answer in the simplest form.
- (b) There are 588 yellow beads in the box. How many beads are there in the box altogether?

Do not write in this space

Ans: (a) \_\_\_\_\_ [1]

(b) \_\_\_\_\_ [2]

15. The table below shows the local postage rates:

Weight Step Up to (Max Weight: 2 kg)	Packages
20g	\$0.50
50g	\$0.70
100g	\$1.10
Per additional step of 100g	\$1.20

- (a) What is the total cost of sending 2 separate packages, one weighing 40 g and another weighing 85 g?
- (b) Given that Jerry paid \$22.70 for sending a package, what was the **maximum** mass of the package he sent?

Do not write in  
this space

Ans: (a) \_\_\_\_\_ [1]

(b) \_\_\_\_\_ [3]

**P5 Math Term Review 2 Revision Practice**

Name: \_\_\_\_\_

Class: \_\_\_\_\_

16. Tom went to a furniture shop to buy 5 shelves, 6 chairs and 2 tables. A shelf cost \$26 more than a chair. A table cost \$15 more than a shelf. Tom paid \$394. What was the total cost of 1 shelf, 1 chair and 1 table?

Do not write in  
this space

Ans: \_\_\_\_\_ [5]

18. For every book Tony sells, he gets \$1.75 as commission. He gets an additional \$1.50 for every 8 books sold. How many books did Tony sell if he earned \$50 in commission?

Do not write in  
this space

Ans: \_\_\_\_\_ [5]

END OF PAPER

YEAR : 2016  
LEVEL : PRIMARY 5  
SCHOOL : HENRY PARK PRIMARY  
SUBJECT : MATHEMATICS  
TERM : CA2

Q1  $2u = 29.20$   
 $1u = 14.60$   
 $14.60 \times 15 \Rightarrow \underline{\$219}$

Q2  $2250 \times \frac{7}{100} = 157.50$   
 $2250 + 157.50 \Rightarrow \underline{\$2407.50}$

Q3  $9u = 72$   
 $1u = 8$   
 $8 \times 5 \Rightarrow \underline{40}$

Q4 12 potted plants

Q5 Total number of apples and durians:  $47 + 72 = 119$   
Total number of fruits:  $47 + 18 + 72 + 15 + 32 + 16 \rightarrow 200$   
 $\frac{119}{200} \times 100 \% \Rightarrow \underline{59.5 \%}$

Q6  $3 \times 30 = 90$   
 $1u = 30$   
 $2u \Rightarrow \underline{60 \text{ oranges}}$

Q7a  $45 + 15 = 60$   
 $100 - 60 = 40$   
 $\frac{40}{100} \div 20 \Rightarrow \frac{2}{5}$

Q7b  $40 \% = 588$   
 $1 \% = 14.70$   
 $14.70 \times 15 = 220.50$   
 $588 + 220.50 + 661.50 \Rightarrow \underline{1470 \text{ beads}}$

Q8  $5.75 - 2.55 = 3.20$   
 $2u = 3.20$   
 $1u = 1.60$   
 $1.60 \times 3 = 4.80$   
 $5.75 - 4.80 \Rightarrow \underline{0.95 \text{ kg}}$

Q9  $25 \times 25 = 625$   
 $13 \times 13 = 169$   
 $625 + 169 = 794$   
 $A = \frac{1}{2} \times 38 \times 13 = 247$   
 $B = \frac{1}{2} \times 25 \times 25 = 312.5$   
 $794 - 247 - 312.5 \Rightarrow \underline{234.5 \text{ cm}^2}$

Q10  $24 \times \frac{20}{100} = 4.80$   
 $24 - 4.80 = 19.20$   
 $24 \times 5 = 120$   
 $19.20 \times 5 = 96$   
 $120 + 96 \Rightarrow \underline{\$216}$

Q11 54 girls

Q12  $10u = 30$   
 $1u = 3$   
 $3 \times 15 \Rightarrow \underline{45 \text{ students}}$

Q13  $25 \times 12 \times 10 = 3000$   
 $2u = 3000$   
 $1u = 1500$   
 $1500 \times 5 = 7500$   
 $25 \times 12 \times 14 = 4200$   
 $7500 - 4200 = 3300 \Rightarrow \underline{3.3 \text{ } \ell}$

Q14  $320 + 200 = 520$   
 $1860 - 520 = 1340$   
 $2u = 1340$   
 $1u = 670$   
 $670 + 520 \Rightarrow \underline{\$1190}$

Q15a  $\$1.10 + \$0.70 \Rightarrow \underline{\$1.80}$

Q15b  $\$22.70 - \$1.10 = \$21.60$   
 $\$21.60 \div \$1.20 = \$18$   
 $18 \times 100 \text{ g} = 1800 \text{ g}$   
 $1800 + 100 \Rightarrow \underline{1900 \text{ g}}$

Q16  $7 \times 26 = 182$   
 $15 \times 2 = 30$   
 $182 + 30 = 212$   
 $394 - 212 = 182$   
 $13u = 182$   
 $1u = 14$   
 $14 + 26 = 40$   
 $40 + 15 = 55$   
 $55 + 40 + 14 \Rightarrow \underline{\$109}$

Q17a  $2B = 30$   
 $1B = 15$   
 $15 \div 3 \Rightarrow \underline{\$5}$

Q17b  $5B = 15 \times 5 \rightarrow 75$   
 $6SW = 5 \times 6 \rightarrow 30$   
 $75 + 30 \Rightarrow \underline{\$105}$

Q18 Commission for 8 books:  $\$1.75 \times 8 = \$14$   
Total commission for 8 books:  $\$14 + \$1.50 = \$15.50$   
 $\$50 \div \$15.50 = 3.22$  (sold 3 sets of 8 books)  
3 sets of 8  $\rightarrow 3 \times 8 = 24$  books  
24 books  $\rightarrow 3 \times \$15.50 = \$46.50$   
 $(\$50 - \$46.50) \div 1.75 + 24 \Rightarrow \underline{26 \text{ books}}$

End
